

A Universal System for Plasmid DNA Isolation

HighPrep™ Plasmid DNA Plus Isolation Kit- Magnetic bead-based system

- High throughput rapid isolation of high and low copy number plasmid DNA from bacterial cultures
- Also works with BACs, PACs, Cosmids, and Fosmids
- No toxic organic solvents
- No filtration or vacuum steps
- Easily automated on many liquid handling workstations

Remarks:

MagBio HighPrep™ Plasmid DNA Isolation Kit allows isolation of High yield and high purity plasmid DNA from different media types. It is compatible with a broad range of plasmid types:

- Low copy plasmids
- High copy number plasmids
- Cosmids
- Bacs
- Fosmids
